30000601

Register Number					

2017 GEOLOGY (PG Degree Standard)

Time Allowed: 3 Hours

[Maximum Marks: 300

Read the following instructions carefully before you begin to answer the questions.

IMPORTANT INSTRUCTIONS

- 1. The applicant will be supplied with Question Booklet 10 minutes before commencement of the examination.
- 2. This Question Booklet contains 200 questions. Prior to attempting to answer the candidates are requested to check whether all the questions are there and ensure there are no blank pages in the question booklet. In case any defect in the Question Paper is noticed it shall be reported to the Invigilator within first 10 minutes and get it replaced with a complete Question Booklet. If any defect is noticed in the Question Booklet after the commencement of examination it will not be replaced.
- 3. Answer all questions. All questions carry equal marks.
- 4. You must write your Register Number in the space provided on the top right side of this page. Do not write anything else on the Question Booklet.
- 5. An answer sheet will be supplied to you, separately by the Invigilator to mark the answers.
- 6. You will also encode your Register Number, Subject Code, Question Booklet Sl. No. etc. with Blue or Black ink Ball point pen in the space provided on the side 2 of the Answer Sheet. If you do not encode properly or fail to encode the above information, action will be taken as per commission's notification.
- 7. Each question comprises four responses (A), (B), (C) and (D). You are to select ONLY ONE correct response and mark in your Answer Sheet. In case you feel that there are more than one correct response, mark the response which you consider the best. In any case, choose ONLY ONE response for each question. Your total marks will depend on the number of correct responses marked by you in the Answer Sheet.
- 8. In the Answer Sheet there are four circles (A), (B), (C) and (D) against each question. To answer the questions you are to mark with Ball point pen ONLY ONE circle of your choice for each question. Select one response for each question in the Question Booklet and mark in the Answer Sheet. If you mark more than one answer for one question, the answer will be treated as wrong. e.g. If for any item, (B) is the correct answer, you have to mark as follows:

- 9. You should not remove or tear off any sheet from this Question Booklet. You are not allowed to take this Question Booklet and the Answer Sheet out of the Examination Hall during the examination. After the examination is concluded, you must hand over your Answer Sheet to the Invigilator. You are allowed to take the Question Booklet with you only after the Examination is over.
- 10. The sheet before the last page of the Question Booklet can be used for Rough Work.
- 11. Do not tick-mark or mark the answers in the Question Booklet.
- 12. Failure to comply with any of the above instructions will render you liable to such action or penalty as the Commission may decide at their discretion.

- 36. Stereographic projection is derived from
 - (A) Gnomonic projection
 - Spherical projection
 - (C) Orthographic projection
 - (D) Clinographic projection
- 37. In stereographic projection, two fold symmetry is represented by the symbol

(B)

(C) \(\sum_{\chi}

- (D)
- 38. In gnomonic projection, the plane of projection is usually taken as
 - Horizontal plane tangent to North pole of the sphere
 - (B) Equitorial plane tangent to South pole of the sphere
 - (C) Tangential North pole of the stereographic projection
 - (D) Horizontal plane tangent to South pole of spherical projection
- 39. The international symbol $\overline{3}2$ m has
 - (A) combination of rotation axes
 - rotoinversion with rotation and mirror
 - (C) one rotation with parallel mirrors
 - (D) three rotation axes and perpendicular mirrors
- 40. Dipyramid is in the class

(B) 2 mm

(C) 222

(D) $\frac{2}{m}$

41. Leucite does not occur in

Plutonic rocks

- Volcanic rocks (B)
- (C) Sedimentary rocks
- (D) Intermediate Igneous rocks

Match the following 42.

- Uniaxial Negative (a)
- Leucite 1.
- Uniaxial Positive (b)
- 2. Sodalite

(c) Isotropic

- 3. Nepheline
- (d) **Biaxial Positive**
- Albite 4.

177.	The	appropriate name for dynamo-therm	ıal meta	morphism is		
	4	Syntectonic metamorphism				
	(B)	Shear metamorphism	. •			
•	(C)	Burial metamorphism	-		•	
	(D)	Hydrothermal metamorphism				
•			•			•
178.	A re	latively impermeable formation neit	her cont	aining nor transmi	tting water, like g	granit
i e	is ca	lled				
	(A)	Aquifer	(B)	Aquiclude	•	
	4	Aquifuge	(D)	Aquitard		
179.	The i	intermediate zone in the zone of aera	ation is			
	(A)	Phreatic water	(B)	Soil-water zone		
	(0)	Vadose zone	(D)	Capillary zone	,	
180.		rate at which water of prevailing h of aquifer under a unit hydraulic g			smitted through	a uni
	(A)	Intrinsic permeability	٠			
	(B)	Permeability				
	9	Transmissivity				-
	(D)	Storage-coefficient				
	-					
181.	Trace	er test can be done to determine				**
	(A)	Porosity	(B)	Storativity	4	
	400	Hydraulic conductivity	(D)	Transmissivity		•
						٠
182.	The f	ollowing is not a major constituent o	of dissolv	ed solids in potable	water	
	4	Arsenic	(B)	Bicarbonate		٠
	(C)	Calcium	(D)	Silion		

183.	If Ca	CO ₃ hardness in mg/l, (cl	assified after	Sawy	yer and McCa	rty) of the wat	er ranges from
	75–10	00, it is called			_		
	(A)	soft water	•	(72)	moderately l	nard water	•
	(C)	hard water	*.	(D)	very hard wa	iter	
			•				
184.	A sat	urated but relatively imp	ermeable ma	terial	that does not	yield apprecia	able quantities
	of wa	ter to wells is an			_		
	(A)	confined aquifer		(B)	aquiclude		:
•	(C)	aquitard		(D)	aquifuge		
				,			
185.	Drink	king water standard for R	adium 226 (R	a^{226}	in $\mu\mu$ c/l is	ī. · · · · · · · · · · · · · · · · · · ·	
	. 4	3		(B)	6	•	
. •	(C)	9		(D)	12		
•			÷ .				
186.	Whic	h one of the following is n	on point sour	ce of g	ground water o	contamination?	•
	(A)	From waste water lagoo	n	-			
	(B)	From septic systems					•
÷	(C)	From tanks					
•		From agriculture activit	y	•			
						•	
187.	Gyps	um ($CaSO_4$) to a soil is ac	lded so that b	y bas	e exchange the	e soil texture a	nd drainability
	can b	·					
* .*	W	increased		(B)	decreased		
	(C)	neither increased nor de	creased	(D)	increases on	ly soil texture	
	٠.		· · · · · · · · ·				
188.	5 ppn	n of NO ₃ is same as			a a		
4	(A)	31 epm	•		↑ 62 epm		
	(A) (C)	93 epm		(D)	124 epm		
	(0)	oo epm ,		(11)	17-4 chin		

189.	Two	dimensional square sha	ned nictur	e element (· displayed on a c	ompuite	er is calle	ed
100.	(A)	Digit		(B)	Nadir point			
		Pixel	•	(D)	Origin			:
190.	Freq	uency of change and ar	rangement	of tones in	an image is cal	lled	•	
,	(A)	Landform		(D)	Texture		•	
	(C)	Contrast		(D)	Period			
	_						·	•
191.	Visib	le light range of electro	magnetic r	adiations l	nave wavelengtl	ns betw	een	
	(A)	$0.2-0.5~\mu m$		(B)	$0.3-0.6~\mu m$	٠		
•	(0)	$0.4 - 0.7 \ \mu m$		(D)	$0.5 - 0.8 \ \mu m$,	
		•			•			
192.	Whic	h of the following emit	electromag	netic radia	itions?			
	(1)	Frozen water		•		•		
•	(2)	Boiling water						•
	(3)	Lake water	-					
	(A)	1 only		(B)	1 and 2 only			
٠	9	1, 2 and 3		(D)	1 and 3 only			• • • • • • • • • • • • • • • • • • • •
19 3.	B2/B	1 band ratio gives infor	mation abo	ut				
	4	Iron oxide		u				
	(B)	Clay minerals			•	** *		•
	(C)	Vegetation					•	
	(D)	Aluminum Hydroxide	·					
			· · · · · · · · · · · · · · · · · · ·					

194. If 'I' is the intensity of magnetization, 'k' is the susceptibility and 'H' is the external magnetic field, then

(A)
$$I = k/H$$

$$I = k \cdot H$$

(C)
$$I = k + H$$

(D)
$$I = k - H$$

130.	AA 1110	ch one of the following dams is known	as the	safest dam?		
	(A)	Buttress	(B).	Arch		
	(C)	Earth	(P)	Gravity		
	•					
196.		——— was driven into the hillside	e to int	ersect the or	e at a lower le	vel
	(A)	Shaft	(B)	Ore bin		
	(C)	Open pit		$oldsymbol{eta_{ m Adit}}$		
	(,-)		,	11010	•	•
105	rio.			.=.		
197.		portion of a dam that touches the grou e dam.	ind on	the upstream	n side is calle	
•	(A)	Toe		Heel		,
			(D)			
	(C) ·	Axis	(D)	Foot	•	
					•	
198.	For t	he construction of which one of the foll	lowing	dams is sou	nd foundation	rock required?
	(A)	Arch dam	•		,	•
	(B)	Earth dam				•
	(C)	Embankment dam				
	D/	Gravity dam				
199.	Brick	, stone, cast iron or steel casing placed	l aroun	d a tunnel is	s called	
	(A)	Over break	(B)	Face	canca	: "
. •	(C)	Shaft		Lining		
•	(0)	Share	(rumg		
• .						
200.	The –	dams are most rigid m	asonar	y or concrete	dams with hi	gh unit loads.
	(A)	Buttress				
	(B)	Arch				•
	(C)	Earth				
•		Gravity			·	
				÷	•
