Question Booklet Code:	Register					STEP
	Number	L.,		100		

2019 COMPUTER SCIENCE

Time Allowed : 3 Hours] [Maximum Marks : 300

Read the following instructions carefully before you begin to answer the questions.

IMPORTANT INSTRUCTIONS

- The applicant will be supplied with Question Booklet 15 minutes before commencement of the examination.
- 2. This Question Booklet contains 200 questions. Prior to attempting to answer, the candidates are requested to check whether all the questions are there in series and ensure there are no blank pages in the question booklet. In case any defect in the Question Paper is noticed, it shall be reported to the Invigilator within first 10 minutes and get it replaced with a complete Question Booklet. If any defect is noticed in the Question Booklet after the commencement of examination, it will not be replaced.
- Answer all questions. All questions carry equal marks.
- 4. You must write your Register Number in the space provided on the top right side of this page. Do not write anything else on the Question Booklet.
- 5. An answer sheet will be supplied to you, separately by the Room Invigilator to mark the answers.
- 6. You will also encode your Question Booklet Code with Blue or Black ink Ball point pen in the space provided on the side 2 of the Answer Sheet. If you do not encode properly or fail to encode the above information, action will be taken as per Commission's notification.
- 7. Each question comprises four responses (A), (B), (C) and (D). You are to select ONLY ONE correct response and mark in your Answer Sheet. In case you feel that there are more than one correct response, mark the response which you consider the best. In any case, choose ONLY ONE response for each question. Your total marks will depend on the number of correct responses marked by you in the Answer Sheet.
- 8. In the Answer Sheet there are four circles (A), (B), (C) and (D) against each question. To answer the questions you are to mark with Blue or Black ink Ball point pen ONLY ONE circle of your choice for each question. Select one response for each question in the Question Booklet and mark in the Answer Sheet. If you mark more than one answer for one question, the answer will be treated as wrong. e.g. If for any item, (B) is the correct answer, you have to mark as follows:

- 9. You should not remove or tear off any sheet from this Question Booklet. You are not allowed to take this Question Booklet and the Answer Sheet out of the Examination Hall during the time of examination. After the examination is concluded, you must hand over your Answer Sheet to the Invigilator. You are allowed to take the Question Booklet with you only after the Examination is over.
- 10. Do not make any marking in the question booklet except in the sheet before the last page of the question booklet, which can be used for rough work. This should be strictly adhered.
- 11. Applicants have to write and shade the total number of answer fields left blank on the boxes provided at side 2 of OMR Answer Sheet. An extra time of 5 minutes will be given to specify the number of answer fields left blank.
- 12. Failure to comply with any of the above instructions will render you liable to such action or penalty as the Commission may decide at their discretion.

28.

JSOCS/19

- 32. If 'Top' points at the top of the stack and 'Stack []' is the array containing stack elements, then which of the following statements correctly refect the push operation for inserting 'item' into the stack?
 - (4) top = top +1; stack [top] = item;
- (B) stack [top] = item; top = top +1;
- (C) stack [top + -] = item;
- (D) Both (A) and (C) are correct

33. The statement

fl.write ((char ∀) and obj1, size of (obj 1));

which one of the following is correct for the above statement?

- (A) Writes the member functions of obj1 to f1
- Write the data in obj1 to f1
- (C) Write the member function and data of obj1 to f1
- (D) Write the address of obj1 to f1
- 34. Which of the following is not an inherent application of stack
 - (A) Reverse a string

- (B) Evaluation of post fix expression
- (C) Recursion Implementation
- Job scheduling
- 35. What is an another name of exchange sort?
 - (A) Insertion sort

Bubble sort

(C) Shell sort

- (D) Heap sort
- 36. How many private member functions are allowed in a class?
 - (A) Only 1

(B) Only 7

(C) Only 255

- As many as required
- 37. What is the worst case time complexities of a Quick sort?
 - (A) O(n)

(B) $O(n \log n)$

(C) $O(\log n)$

 $O(n^2)$

38.	All t	the child nodes of a parent node ar	e referr	ed as
	(A)	Neighbors	(3)	Siblings
	(C) ·	Internal nodes	(D)	leaf nodes
				•
39.	The	traversal operation on a binary tr	ee is us	sed to visit each node in the tree exactly
	(1)	Once	(B)	twice
	(C)	thrice	. (D)	more
				· ·

- (C) Uncertainity

88. Which of the following formula is used to calculate the Return On Investment (ROI)?

(A)
$$ROI = \frac{\text{total profit}}{\text{total investment}} \times 100$$

(B) ROI =
$$\frac{\text{average annual profit}}{\text{average annual investment}} \times 100$$

$$ROI = \frac{\text{average annual profit}}{\text{total investment}} \times 100$$

(D)
$$ROI = \frac{\text{total investment}}{\text{total profit}} \times 100$$

89. reflects the number of different ways of meeting requirements.

(A) PREC

- (C) RESL
- (D) TEAM

90. Which one of the following is false of a project charter?

- (A) It identifies the high level time schedule for the project
- (B) It provides an overview of the resource and budget for the project
- (C) It lists the stakeholders and their responsibilities towards the project

91.	What is	Case-Based	reasoning?
U.L.	WILL IS	Case-Daseu	reasoming:

- (A) target parameter + source parameter
- (B) target parameter * source parameter
- target parameter source parameter
- (D) target parameter / source parameter

92. The information processing size is initially measured in (Unadjusted Function Points (UFPs) to which a Technical Complexity Adjustment (TCA) can then be applied by

Albercht

- (B) Parkins
- (C) Brooks
- (D) Hamids

93. What assess the risk and your plans for risk mitigation and revise these when you learn more about the risk?

Risk monitoring

- (B) Risk planning
- (C) Risk avoidance
- (D) Risk identification

94. ———— risk threatens the quality and timeliness of the software to be produced.

(A) Project Risk

Technical Risk

- (C) Business Risk
- (D) Known Risk

95.	-	——is a proven and well–	accepted engi	incering technique.	
	(A)	Designing	(B)	Analysing	
		Modeling	(D)	Testing	
96.		ch diagram is an interacti sages?	on diagram	that emphasizes the time ordering	0
	(A)	Collaboration diagram			
		Sequence diagram		•	
	(C)	Class diagram		,	
	(D)	Object diagram			
			•		
97.	Whi	ch of the following stereotyp	e that not apj	ply to dependency relationships?	
	(A)	Bind	(B)	Derive	
		Utility	(D)	Use	
98.	Whi	ch of the following language	is untyped ve	et supportive of dynamic typing?	
	(A)	Ada	(B)	C++	
	(C)	Java		Smalltalk	
	,				
99.	Find	the one which is not associa	ated with oth	ers.	
	(A)	Sequence diagram	45)	Class diagram	
	(C)	Collaboration diagram	(D)	State chart diagram	
100.		is the graphical repre	ecentation of	work flows in stepwise.	
100.	(A)	State chart diagram		Activity diagram	
	(C)	Semantic diagram	(D)	Use case diagram	
	\-/		\- /		

101.	Which is a semantically closed abstraction of a system in UML?						
	(A)	Diagram	(B)	View			
	W).	Model	(D)	Subsystem			
102.	The	different modules of classes :	and their rela	ntionships are represented in			
	4	Component diagram	(B)	Interaction diagram			
	(C)	Collaboration diagram	(D)	State chart diagram			
103.		CP connection is identified nation IP address, destination	_	ple (Source IP address, Source part known as a			
	(A)	Data pair	(B)	Packet pair			
		Sacket pair	(D)	IP pair			
104.	Whic	ch one is correct for triangula	ar routing?	•			
	(A)	CN to MN, HA to COA/MN	f, CN back to	MN			
	(B)	MN to HA, CN to COA/MN	, CN back to	MN			
	V	CN to HA, HA to COA/MN,	, MN back to	CN			
	(D)	CN to HA, HA to COA/MN	, CN back to	MN			
105.	MAC	LLC protocol stands for		,			
	(A)	Modem Access Control/ Log	gical Link Co	ntrol			
	(E)	Media Access Control/ Logi	ical Link Con	trol			
	(C)	Mobile Access Control/ Log	ical Link Co	ntrol			
	(D)	Monitor Access Control/ Lo	gical Link Co	ontrol			
106.	The Home Agent sets up ————— containing the mobile node's home IP address and the current care of address.						
	(A)	Pointers binding	. (25)	Mobility binding			
	(C)	Agent's binding	(D)	Network binding			

107.	allows messages to be sent to all nodes in a specific Region.						
	(A)	Nemocast	(B)	Spatiocast			
	400	Geocast	(D)	Aerocast			
108.		ch algorithm allows the server an otiate an encryption?	d clie	ent to authenticate each other and to			
	(A)	Internet message access protocol	(B)	Session Initiations protocol			
	46	Handshake protocol	(D)	Post office protocol			
109.		ch protocol defines a server push o at device?	perat	ion, to sends unrequested content to a			
	4	Wireless session protocol		·			
	(B)	Wireless Transaction protocol		,			
	(C)	Wireless Access protocol					
	(D)	Wireless application protocol					
,							
110.		is a last alternative to forwa	ard a	packet across an unknown topology.			
	(A)	Filtering	(C)	Flooding			
	(C)	Unicasting	(D)	Multicasting			
111.				to find a path between source and			
	desti	ination and to forward the packets a	pprop				
	(A)	Comparing	T	Routing			
	(C)	Synchronizing	(D)	Encrypting			

112.	The library ———— has been defined for interaction with a user.						
	(A)	String	(B)	URL			
	(C)	WML Browser		Dialogs			
113.	mec	nobile node move from one net hanism, without the IP level bein nded to enable the agent to detect	ng awai	re of it. The agent discovery process is			
	(A)	exchange		interchange			
	(C)	discovery		handoff			
114.		provides security service gateway.	es betw	veen the mobile device (client) and the			
	(A)	WTP	(B)	WAE			
	(C)	WSP		WTLS .			
115.	strai	-		when the generating curve is pushed the curve as it moves through space			
	(A)	lathing	(3)	extrusion			
	(C)	lofting	(D)	trimming			
116.		ch one is done on a computers using Premiere and Final cut?	ng Non	Linear Editing (NLE) software such as editing			
	(C)	trimming	(D)	blank space removal			
117.	Whi	ch files are used for ringtones on A	.pple's i	phone?			
	(A)	FLV (Flash Video Files)	(B)	SWF (Shock Wave Flash)			
• .	(C)	AAC (Advanced Audio Coding)	(2)	M4R file			
118.		amplifiers use 100% of th	ne input	t cycle for generating the output.			
	(1)	Class-A	(B)	Class-B			
	(C)	Class-AB	(D)	Class-C			
		•					

119.	as with a video game?						
	(A)	Linear	(B)	Non-Linear			
	(C)	Sequential	(D)	Network			
120.		t is the name for the thin strips o setters?	f lead in	nserted between the lines by traditiona			
	(A)	Kerning	(B)	Attributes			
	(%)	Leading	(D)	Condensed			
121.		——— were designed to use as pu ultimedia communication applicat		itched networks to support a wide range			
	(A)	telephone networks	(B)	data networks			
	(C)	broadcast television networks		broadband multiservice networks			
122.	Whie	ch one of the following is how quic	kly the	sound fades away?			
	(A)	Envelope	(B)	Attack			
	4	Decay	(D)	Sustain			
123.		applications that demand a high las the transmission medium.	bit rate	over long distances, ————————————————————————————————————			
	(A)	Two wire open lines	(B)	Twisted pair lines			
-		Coaxial cable	(D)	Optical fiber			
124.	In multipoint conferencing, ————————————————————————————————————						
	(A)	Continuous presence mode	(B)	Voice-activated switching mode			
	(0)	Centralized mode	(D)	Decentralized mode			
125.	Whic	ch of the following search engine i	s used t	to search people?			
		Big foot	(B)	Yahoo			
	(C)	Web crawler	(D)	Alta vista			

- 126. Who initially defined HTML?
 - (A) Urbana-Champaign
 - (C) Andreessen

Tim Berners -Lee

- (D) Eric Bina
- 127. What is the output of the following tags

<FRAMESET COLS = "20%, *">

</FRAMESET>

- (A) Divide the page into two horizontal frames with 20% of page size for frame1 and remaining size for frame2
- Divide the page into two vertical frames with 20% of the page size for frame1 and remaining size for frame2
- (C) Divide the page into two horizontal equal size frames
- (D) Divide the page into two vertical equal size frames
- 128. In a finite automata transition function maps
 - (A) $\Sigma \times Q \rightarrow \Sigma$

(B) $Q \times Q \rightarrow \Sigma$

 $Q \times \Sigma \rightarrow Q$

- (D) $\Sigma \times \Sigma \rightarrow Q$
- 129. Find a reduced grammar equivalent to the grammar

 $S \rightarrow aAa$

 $A \rightarrow bBB$

 $B \rightarrow ab$

 $C \rightarrow aB$

(A) $S \rightarrow aAa \ A \rightarrow bab$

(B) $S \rightarrow aA \quad A \rightarrow b$

- 40
- $S \rightarrow aAa \ A \rightarrow bBB \ B \rightarrow ab$
- (D) $S \rightarrow aAa \ A \rightarrow bCa \ C \rightarrow aab$

- 130. A Pushdown Automata
 - (A) A automata with input and processor
 - A automata together with a simple memory
 - (C) A automata with output and processor
 - (D) A non deterministic finite automata
- 131. For a standard Turing machine
 - (A) $\Sigma = T$

- (B)
- $T\subseteq\Sigma$

(C) $\Sigma \subseteq T$

(10)

 Σ is a proper subset of T

132.	Which one of the following lies in the possibility of making the transition from	an
	algorithm to a program either incorrectly or very inefficiently?	

(A) Correctness

(5) Peril

(C) Opportunity

(D) Efficiency

133. Which one of the following is used for modeling a wide variety of applications like transportation, communication, social and economic networks and project scheduling?

(A) Sorting

(B) Searching

(C) String processing

(C) Graph

134. The worst case complexity of Merge sort algorithm is

 $O(n \log n)$

(B) $O(n^3)$

(C) $O(n \log n^x)$

(D) $O(n^2)$

135. In binary search the best case analysis of successful search is

- W.
- $\theta(1)$

(B) $\theta(n^2)$

(C) $\theta(n^3)$

(D) $\theta(n)$

136. In asymptotic notation the function f(n) = O(g(n))

- (A) iff there exist positive constants C and no such that $f(n) \ge c * g(n)$ for all $n, n \ge n0$
- (B) $f(n) \ge C * (n+n0) * g(n)$ for all $n \ge n0$
- (C) $f(n) \ge C * (n-n0) * g(n)$ for all $n \ge n0$

iff there exist positive constants C and no such that $f(n) \le c * g(n)$ for all $n, n \ge n0$

137.	Hear	o sort algorithm is based on		
	(A)	Fibonacci heap	(B)	Binary tree
-	(0)	Priority Queue	. (D)	FIFO
•				
138.	If tw set?	o sets S1 and S2 do not have any o	commo	n element, then what is the name of the
	(A)	Null set	(B)	Subset
	(C)	Union	(1)	Disjoint
	,			
139.		——— of two sets is formed b and set that do not already appear i	•	ng to one set all the elements from a irst set.
		Union	(B)	Intersection
	(C)	Difference	(D)	Subset
	, ,	•		
140.	An –	data type is user-defin	ned tyr	pe which provides a way for attaching
		es to numbers.		
	(A)	Structure	· (B)	Union
	(C)	Class	(20)	enumeration
÷				
141.		——— are printers, functions, arra	avs and	l references
	(A)	Basic data types	(B)	User defined data types
		Derived data types	(D)	Enumerated data types
•		Soliton mass of poor	()	
· · · .				
	• •		٠.٠	
142.	Whic	ch is the correct syntax to call a me	ember i	function using pointers?
-	(1)	Pointer -> fuction ()	(B)	Pointer . function ()
	(C)	Pointer :: function ()	(D)	Pointer : function ()

143.	At a maximum, how many elements would the linear searching technique require to traverse in an <i>n</i> -element array?						
	(A)	0	(B)	1			
	(9)	n	(D)	n-1			
			•				
144.		ch of the following decides if a fun reated as inline in the executable c		hat is declared inline is indeed going to			
	(1)	Compiler					
	(B)	Linker					
	(C)	Loader	-				
	-(D)	Preprocessor	•				
			·				
145.	Wha	at is an efficiency of stack data stru	cture f	or insertion operation?			
		O(1)	(B)	O(n)			
	(C)	O(log n)	(D)	$O(n \log n)$			
	1						
146.	·	are called single line abbro	eviatio	ns for groups of instructions.			
	(A)	Micro	0	Macros			
•	(C)	Mini	(D)	Microprocessor			
147.	The calle		n be pa	artitioned into a sequence of substrings			
	(A)	Alphabets	(E)	Tokens			
	(C)	Constructs	(D)	Data elements			
148.	In a	compiler, one of the following has a	reducer	I memory space and time			
	(A)	Lexical Analysis		and and the same			
	(B)	Syntax Analysis					
	(C)	Code generation	- '				
	1	Machine dependent optimization					
	₹ .						

149.	A thread is considered to be ———————————————————————————————————								
	(A)	Interleaving	(B)	Intertasking					
	(C)	Interoperating	90)	Interactive					
1 50.	Erro	or handling and I/O interrupt ha	ndling are	e the functions of

(A) Putting more people on a late job makes it later

Work expands to fill the time available

- (C) If a system does not have to be reliable, it can meet any other objective
- (D) Anything that can go wrong, will go wrong

190. A payback period means

(A) A time taken to find the net profit-

- (C) A time taken to calculate the operation cost
- (D) A time taken to find the setup cost

191. Which one of the following is an investigation to decide whether a prospective project is worth starting?

- (B) Planning
- (C) Project execution
- (D) Maintenance

192. Loc of the product comes under which type of approach?

- (B) Indirect
- (C) Coding
- (D) Design

- 193. What is the rule which defines that "user requirements creep in at an average rate of 2% per month from the design through coding phases" stated by Capers Jones?
 - (A) Project duration estimation
 - (B) Defect removal efficiency
 - (C) Function point equivalence

- 194. What is the activity recommended by ISO 12207 standard that test the components together to see if they meet the overall requirements?
 - (A) Requirement analysis
 - (B) Architecture design

Integration

- (D) Installation
- 195. One of the activity-on-arrow network rules is wrong.
 - (A) A project network may have only one start and end node
 - (B) A link has duration
 - (C) Nodes have no duration

A network may contain loops

- 196. What is the meaning of activity's float?
 - (A) Difference between finished dates and earliest dates

- (C) Difference between mid dates and finished dates
- (D) Difference between mid dates and earliest dates

197.	How	to calculate productivity?		-		•	-
		P = effort/size					
	(B)	P = size/effort				•	•
·.	(C)	P = size/time					•
	(D)	P = effort/time					
						:	
198.		ch one of the following project pa oject Manager?	arameters	is usually	y the first	to be es	stimated by
•	(A)	Cost		. •			
,	(B)	Size				٠.	
	(C)	Duration				•	· .
